## Product Details

- Highly transparent cast film
- Applied wet
- Highly transparent, removable, solvent-based acrylic adhesive
- For the production of individual glass decoration (glass design) through the digital printing process

A highly transparent printable cast film (50 µm) for glass applications. Unprinted areas allow perfectly clear view through the glass. Images with sophisticated details don't need contour cutting anymore; possibility to print special effects like dusted/frosted by using white ink. One-Way-Vision effect without using punched films. Up to 7 years durability.
