

MACmark - MACmask 84.817

Specialty vinyl films designed for paint-mask applications. Specifically developed for producing paint masks on curtain sided substrates and is highly resistant to plasticisers

The powerful adhesive with excellent wetting properties prevents paint infiltrating under the adhesive, resulting in neat edges around work. The film is easy to remove from most surfaces for up to 4 hours after application. Trimming is also made quick and easy.

KEY FEATURES

- ***Very resistant to plasticisers**
- ***Powerful adhesive**
- ***Easy to remove**
- ***Easy trimming**

SPECIALLY DESIGNED FOR

- ***Stencil lettering and designs on tarpaulins banner**

Overview

- TECHNOLOGY
Monomeric PVC
- THICKNESS
80 µm
- ADHESIVE PERFORMANCE
Removable
- DURABILITY OUTDOOR
4 hour(s)
