

WW 309

White gloss vinyl, 100 µm, high tack permanent opaque solvent acrylic adhesive

WW 309 films are specially designed for medium-term indoor and outdoor decoration, with a high-tack adhesive that performs brilliantly on flat and demanding wall surfaces. The WW 309 Series can be paired with several Mactac laminating films, for different finishes and applications ranging from flooring to anti-graffiti solutions. We can't claim that these films are a 'universal' solution, but they come close!

KEY FEATURES

- ***High-tack adhesive for strong adhesion on many different walls**
