

KlearWipe

Why choose KernowJet KlearWipe™?

Dry Erase surfaces can be found in every office, every school, most restaurants... basically almost everywhere. Most of them are covered with ghost writing, that can never be removed. With KernowJet KlearWipe, there's finally the perfect solution for long term dry-erase surfaces, for happy sign makers, printers and end-users.

KernowJet KlearWipe is a clear, PVC-free dry-erase lamination film. It can be manually wet applied or mechanically laminated. Its thickness of 75µm and inherent stiffness makes it easier to apply than any other dry-erase laminate. Highly transparent and with a specially designed permanent adhesive, it is perfect as a laminate for a wide variety of prints and especially designed to adhere to UV-cured inks, without silvering.

The film has been tested with an extensive range of water-based, solvent and acetone-based markers. End-users will love the benefits: KernowJet KlearWipe works with all dry-erase pens, no 'pearling' of the inks when writing, perfect erasability whether it is immediately wiped, or erased after leaving the writing for long period. There is absolutely no ghosting, even when used with permanent markers!

It turns every smooth surface into a dry-erase board, not only white or printed substrates but also coloured, metallic or blackboards with absolutely no silvering. KlearWipe's surface won't get damaged when cleaned with solvents or IPA. It is the most scratch-resistant dry-erase film in the industry and is compliant with the EN Standards: EN71-3: 2013 required for the safety of toys. The film is suitable for hospitals or nursery walls as well as kids furniture, toys and so much more.

Tip:

KlearWipe™ is a non-printable material designed to be laminated over your prints

How to clean KernowJet KlearWipe™

Dry Erase Marker

Remove with any standard cloth or whiteboard eraser

Liquid Chalk Marker

Remove with any standard wet cloth

Permanent Marker

Remove with any standard cloth & Isopropyl alcohol

Code	Product Name	Thickness	Width (mm)	Length (m)	Adhesive (after 24hrs)
